SUMMARY

Computer Science student with hands-on experience in AI-assisted, full-stack web development and multi-agent systems. Experienced in building rapid prototypes and MVPs using Next.js, FastAPI, and modern LLM tooling, with strong foundations in networking, cybersecurity, and Git-based workflows.

EDUCATION

University of Dhaka

CSE, 3rd Year 2nd Semester; **CGPA: 3.75/4.00**

Dhaka, Bangladesh

2023 – Present

Notre Dame College

HSC; **GPA: 5.00**

Dhaka, Bangladesh

2020 – 2022

TECHNICAL SKILLS

Web Development: HTML, CSS, JavaScript, TypeScript, React.js, Next.js, Tailwind CSS, Node.js, Express.js, FastAPI, LLM-powered agents (CrewAI, LangChain), Gemini API, RAG systems

Databases & Tools: MongoDB, PostgreSQL, Supabase, Git & GitHub, Flutter, Dart

Cybersecurity & CTF: Web Exploitation, Reverse Engineering, Forensics, OSINT, Networking

Design & Other: Figma, Canva, Photoshop, Illustrator, C/C++, JAVA

EXPERIENCE

Associate Secretary, Faculty of Science

Dhaka University Career Club, Dhaka

Feb 2025 – Present

- Organized national-level career development events and networking sessions
- Designed digital and print media for club events and campaigns
- Contributed to successful seasonal programs and creative projects

President of Publications

Notre Dame Information Technology Club, Dhaka

Sep 2022 – Apr 2023

- Led publications wing and organized inter-college IT competitions and events
- Managed cross-team communication for IT-related events
- Supervised design and branding activities for the club

Graphics & Visual Branding Incharge, Wikipedia Editorial Team

Notre Dame English Club, Dhaka

Jun 2022 – Jul 2023

- Directed creative design and branding for editorial and research team activities
- Organized university-level competitions and seminars
- Supported editorial initiatives with research and design inputs

Graphic Designer

Expertiseum, Dhaka

Oct 2020 – Aug 2021

- Designed event posters, promotional materials, and certificates for clients and organizations
- Managed design of crests, branding assets, and other visual deliverables for events and programs

PROJECTS

Shinra AI | Next.js, Gemini, FastAPI, CrewAI, Agentic AI | Personal Project | [Github](#)

- Dual-pipeline multi-agent orchestration system that transforms product requirement documents (PRDs) into source-grounded, publishable blog articles with automated claim validation.
- Implements fact-check and rewrite feedback loops using LLM-powered agents to enforce accuracy, style consistency, and alignment with the original PRD intent.

- Provides full observability across the content pipeline, including structured logs, metrics, and token-level tracing for debugging, evaluation, and optimization.
- Designed and developed end-to-end as a solo project using Next.js for the frontend and FastAPI + CrewAI for agent coordination and content-ops automation.

FedeRAG | *FastAPI, Next.js, ChromaDB, Langfuse, Prometheus, Grafana, Gemini* | Personal Project | [GitHub](#)

- Engineered a production-grade RAG system with hybrid retrieval (BM25 + dense) and RRF fusion for improved search accuracy.
- Implemented cross-encoder reranking pipeline to enhance answer precision and grounding.
- Integrated observability stack using Langfuse, Prometheus, and Grafana for end-to-end tracing, latency monitoring (P50/P95), and cost tracking.
- Built CI evaluation pipeline using RAGAS and deterministic metrics to automatically block regressions on pull requests.

MindMate | *Next.js, TypeScript, Tailwind CSS, FastAPI, Supabase* | Group of 3 | Hackathon Project | [GitHub](#)

- Developed the complete frontend interface, implementing responsive UI components and modern design using Next.js and Tailwind CSS.
- Integrated chatbot modules, live calendar, and activity heatmap to enhance user interactivity and experience.
- Collaborated with backend team to connect APIs for real-time data synchronization.

VistaVoyage | *Next.js, TypeScript, Tailwind CSS, FastAPI, PostgreSQL* | Group of 2 | Academic Project | [GitHub](#)

- Modern travel booking platform featuring comprehensive trip planning, booking management, and user authentication systems.
- Built with responsive design principles and integrated backend API for seamless user experience and data management.

SyncroX | *Python, Docker, TCP, Streamlit* | Academic Project | [GitHub](#)

- Collaborative networking platform developed to demonstrate core Computer Networking concepts, including custom TCP protocol design and implementation.
- Implements TCP Tahoe and Reno congestion control algorithms, RTT estimation, and reliable data transmission mechanisms.
- Features secure, containerized code execution using Docker, enabling safe experimentation and real-time interaction within a Streamlit-based interface.

ACHIEVEMENTS

2nd Place – PKI Hackathon 2025 (University Student Category): Team *DU_Apricot* won 2nd prize in the Public Key Infrastructure Hackathon at the PKI Summit 2025, organized by the Office of the Controller of Certifying Authorities (CCA) and ICT Division, Bangladesh. Team members included H.M. Mehedi Hasan and Chowdhury Shafahid Rahman from CSEDU Batch 29.

2nd Place – DU CTF 2024 (25-Hour Capture The Flag): Team *DU_Black_Noodles* secured 2nd place in the intense 25-hour DU CTF 2024, hosted by the University of Dhaka. The competition tested skills across cryptography, reverse engineering, and web exploitation. Team members included Ahil Islam Aurnob, Dibbajothy Sarker, and Chowdhury Shafahid Rahman.

2nd Place – CipherSprint CTF 2025 (Circuit Clash 1.0): Team *DU_Black_Noodles* secured the 1st Runner-Up position in the CipherSprint Capture The Flag (CTF) competition at Circuit Clash 1.0, powered by Knight Squad and organized by the BUP Robotics Club. The team achieved a total score of 1165 points.

2nd Place – DIU CyberCon 2025 (National Capture The Flag Competition): Team *DU_Black_Noodles* achieved the 1st Runner-Up position in the National Capture The Flag Competition 2025, organized by the Cyber Security Club of Daffodil International University under DIU CyberCon. The team secured a total of 3632 points.

3rd Place - BUP CTF 2025: Team *DU_Black_Noodles* earned 2660 points and secured 3rd place at the BUP CTF 2025 powered by Knight Squad. The event featured practical cybersecurity problem-solving across web, network, and reverse engineering challenges.

3rd Place – UAP Cyber Siege 2025: Team *DU_Black_Noodles* won 3rd prize at UAP Cyber Siege 2025, organized by the University of Asia Pacific. The event featured practical cybersecurity problem-solving across web, network, and reverse engineering challenges.

3rd Place – Glowing with Ideas Poster Competition 2025: Team *DU Cyclotron* secured 3rd prize in “Glowing with Ideas: Unleash the Power of Photonics,” organized by IEEE Photonics Society Student Branch Chapter,

University of Dhaka. Presented research on Quantum Cryptography, blending science, visual storytelling, and teamwork.

4th Place – Al-Khwarizmi CTF 2026: Team *DU_Black_Noodles* secured 4th place among 650+ teams in the Al-Khwarizmi Capture The Flag (CTF) 2026, organized by Bangladesh Islamic ChhatraShibir, achieving a total score of 5520 points.
